

Available Now: PANDAA qDx™ SARS-CoV-2

Qualitative Nucleic Acid Test

PANDAA qDx™ products are diagnostic testing kits based on gold standard qPCR technology.

The **SARS-CoV-2 test kit** delivers clinically-actionable results from RNA in one hour.

Test kits for FDA Emergency Use Authorization in CLIA labs:

-  **Fast:** Accurate, reliable results from RNA in 1 hour
-  **Scalable:** Efficient workflow; test 94 samples per run (plus controls)
-  **Plugs in:** Compatible with sample prep and qPCR equipment in most CLIA labs
-  **Supported:** Templates, reagents, and staff support for on-site implementation

Hospital Site: Major Teaching Hospital;
Boston, MA (March 2020)

Test patient samples on site within 72 hrs

- **EUA validation in 48 hrs**
- **Clinically validated** using MA Dept. of Public Health blinded panel
- Demonstrated **concordance with CDC COVID-19 assay**
- **Validated as an LDA/LDT** and in clinical use on the **automated** Abbott m2000sp/rt RealTime system; validated in parallel on **manual workflows** with distinct sample prep and PCR solutions
- Test price is **fully reimbursable** under billing code U0001
- Allows for **efficient allocation of scarce hospital isolation resources**, and for **critical healthcare workers to be screened** quickly and regularly

For Research Use Only. Not for use in diagnostic procedures, except by CLIA labs working within COVID-19 Emergency Use Authorization guidance from the U.S. Food and Drug Administration.
